AUTHOR INDEX VOLUME 6 (1987)

The issue number is given in front of the page numbers

Ahn, H., *see* S. Kim (1) 43– 46
Altınkemer, K. and B. Gavish, Heuristics for unequal weight delivery problems with a fixed error guarantee (4) 149–158
Armour, L.J., D.J. Gates and J.A. Rickard, A convergent optimization algorithm with application to monopolistic firms (5) 197–204
Asmussen, S., The heavy traffic limit of a class of Markovian queueing models (6) 301–306
Assaf, D. and S. Zamir, Continuous and discrete search for one of many objects (5) 205–209
Atkins, D. and P. Iyogun, A lower bound on class of coordinated inventory/production problems (2) 63– 67
Balas, E., R. Nauss and E. Zemel, Comment on: 'Some computational results on real 0–1 knapsack problems' (3) 139–140
Barzilai, J., W.D. Cook and B. Golany, Consistent weights for judgements matrices of the relative importance of alternatives (3) 131–134
Baxter, L.A., *see* C. Kim (6) 297–300
Berman, O., *see* D. Simchi-Levy (5) 243–248
Bixby, R.E. and D.K. Wagner, A note on detecting simple redundancies in linear systems (1) 15– 17
Boucher, J., V. Ginsburgh, Y. Smeers and A. Svoronos, Introducing realistic savings patterns in intertemporal models (5) 211–219
Bouzaher, A., Symmetric QP and linear programming under primal–dual uncertainty (5) 221–225
Boyd, S.C., W.R. Pulleyblank and G. Cornuéjols, Travel – An interactive travelling salesman problem package for the IBM-personal computer (3) 141–143
Chandrasekaran, R. and S.N. Kabadi, Strongly polynomial algorithm for a class of combinatorial LCPs (2) 91– 92
Chaudhry, M.L. and A. Hasham, Software package for the queueing system $M^X/G/1$ (4) 195–196
Chauny, F., R. Loulou, S. Sadones and F. Soumis, A two-phase heuristic for strip packing: Algorithm and probabilistic analysis (1) 25– 33
Cook, W.D., *see* J. Barzilai (3) 131–134
Cornuéjols, G., *see* S.C. Boyd (3) 141–143
Dallery, Y., An improved balanced job bound analysis of closed queueing networks (2) 77– 82
Desrochers, M., A note on the partitioning shortest path algorithm (4) 183–187
Dinghua, S., *see* F.K. Hwang (6) 293–296
Divoky, J.J., Improvements for the Thresh X2 shortest path algorithm (5) 227–232
Dussault, J.-P., *see* P. Marcotte (1) 35– 42
Fishburn, P.C., *see* W.V. Gehrlein (3) 115–120
Gates, D.J., *see* L.J. Armour (5) 197–204
Gavish, B., *see* K. Altınkemer (4) 149–158
Gehrlein, W.V. and P.C. Fishburn, A comparison of algorithms for minimizing bumps in linear extensions of partial orders (3) 115–120
Gerchak, Y. and D. Gupta, How many lottery tickets to buy? (2) 69– 71
Ginsburgh, V., *see* J. Boucher (5) 211–219
Glynn, P.W., Upper bounds on Poisson tail probabilities (1) 9– 14
Golany, B., *see* J. Barzilai (3) 131–134
Granot, F., *see* J. Skorin-Kapov (6) 269–274
Greenberg, H.J., ANALYZE: A computer-assisted analysis system for linear programming models (5) 249–255
Gupta, D., *see* Y. Gerchak (2) 69– 71
Hall, N.G. and R.V. Vohra, An on-line assignment problem with random effectiveness and costly information (4) 163–167
Hart, J.P. and A.W. Shogan, Semi-greedy heuristics: An empirical study (3) 107–114
